

CLS MSS40316 Certificate IV in Competitive Systems & Practices Online Structure

Online training through personalised, high quality learning, support and guidance. Increase your personal value as an employee by becoming a “Lean Thinker” whilst learning techniques in a fun and dynamic way. By completing this program you will be able to see waste and the frustrations/inefficiencies in processes and remove them effectively from your life and work.

Remote (online) Training Session

Interactive LIVE two-hour sessions with your Lean Specialist: all simulations and exercises have been developed specifically for online engagement in order to provide maximum benefit to our learners.

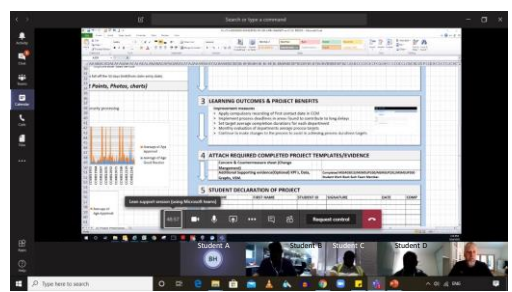

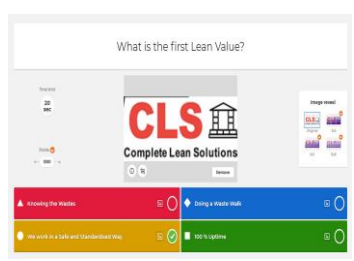

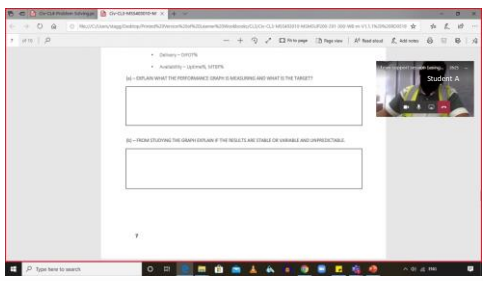

Project Deployment

Skills are tested through practical office, site or home-based projects. They are self-paced with access to Lean Specialists via Zoom, MS Teams or mobile phone. Projects are easily completed and submitted for assessment, with all templates and resources available online.

Evidence Gathering & Assessment

Lean Specialists use workbooks, paper-based project documents, Kahoot! tests and interviews to confirm your competence and understanding of each Lean technique. Throughout the program, project reports are completed using our provided templates and feedback/support is provided continuously by your Lean Specialist.

8 Lean Techniques (self paced - minimum program length is 12 weeks)

- | | |
|---------------------------------|-----------------------|
| 1. Eliminating Waste | (Monday each week) |
| 2. Work Place Organisation (5S) | (Tuesday each week) |
| 3. Visual Management | (Wednesday each week) |
